Vogelfreies Radio

(Radio as free as a bird)

...a brandnew book on shortwave pirate radio from Germany and Switzerland 1983-93

On 180 pages you'll find the profiles of 137 stations, from A like Albatross to Z like Zanzibar, with plenty of nice and rare QSLs.
Plus there's a full colour A3 size supplement with photos etc.

The book is entirely written in the German language.

Here's how to order your copy... In Europe send 20 US \$ cash* to Björn Quäck, P.O.Box 103113, 44031 Dortmund, Germany

Elsewhere in the world the book costs 35 US \$ including airmail delivery.

*no cheques please

PIRATE CONNECTION #14/15

THE SCAPDINAVIAN FREE RADIO MAGAZINE

HOT SUMMER DOUBLE ISSUE!

ANGEL FM

THE RAID - STATION MANAGER WEIRD BEARD REPORTS

CHRIS ISE VISITS WEEKEND MUSIC RADIO

The Angel FM studio May 1995. Front: Hippy Chick (programme controller), mid: Mark King (senior presenter), back: Weird Beard (station manager).

This is **Pirate Connection**, a Free Radio magazine focusing on Scandinavlan, European and North American pirate radio. PC is published 4-5 times a year and the contents are in many respects dependent on contributions from our readers. Everyone is invited to send news or articles related to Free Radio.

Web-page: http://www-pp.kdt.net/jonny/pc.

Subscription rates

Subscription 1 year (5 Issues): Sweden 140 SEK, Scandinavia SEK150 / \$22 / DM35 / £15, Europe SEK160 / \$24 / DM37 / £19, USA and air mail worldwide SEK170 / \$25.

Sample copy: Sweden 30 SEK / 4 IRCs, Elsewhere 35 SEK / \$5 / \$3 / 5 IRCs,

The money should be sent by cash to Stefan Printz (see address below). Alternatively, Stefan's personal postal giro account 690708-2710 can be used. If transferring to this giro account from abroad, add 28SEK due to bank fees. Please send no cheques, coins or mint stamps.

Editorial

Welcome to this double edition of Pirate Connection! I hope it was worth the wait. As we now enter the US Free Radio market, I would like to say a special welcome to all our new readers from USA and Canada. The intention is to expand the mag with more focus on the US pirate scene and as a result of this, Yolanda Lewis starts a US pirate radio feature column, And hopefully more people from across the Atlantic will join our team in the next editions. I'm running out of space, so just let met finish off by saving a big 'thank you' to Chris Lobdell who has decided to stop writing for us. He's done a great job and I have enjoyed his columns very much! But don't worry, we will have someone to take his place till the next issue of PC. Have a nice summer! Stefan

EURO PIRATE SCENE

Stefan Printz Tegelgårdsgatan 14 211 33 MALMÖ SWEDEN xtdspz@lmd.erlcsson.se

Radio 101 International say they will be back on shortwave in the near future. 7360 kHz and 27035 kHz are two frequencies worth checking out. The address in Belgium is still in use.

Radio Blackbeard was heard testing on mediumwave 1636 kHz. He relayed his colleague Bill Lewis of Live Wire Radio who was broadcasting on 76 metres at the time. The signal was picked up by Blackbeard's shortwave transmitter and we wonder how the audio must have sounded likel?

Radio Blue Star was heard over Easter with a splendid signal on 6295 kHz all over Europe. Transmissions started already at midday on Easter Saturday with non-stop music and occasional announcements. Later in the evening, there was a big party with the friends of the operator. Many laughs and shoutings were heard over the air. And the operator was so drunk, he couldn't even announce the address correctly. The broadcast continued all night into Sunday morning and further on to late Sunday evening before the station finally closed! No doubt there is a strong connection to Radio Horizon that was reported in PC #13, we believe it's the same transmitter but maybe Horizon is run by another operator. Some other mags claim they are the very same station. Address: Box 1104, 8001 BC Zwolle. The Netherlands. SPZ

French based <u>Radio Caroline</u> continues to broadcast regularly on the 48 metre band, but changed frequency to 6207 kHz a few months ago. In a recent letter, they say they have increased power to 130 W and they have also printed new QSL-cards which will be sent out to those of you who have not got a reply from the station yet. Address: Box 97, 62217 Beaurains, France.

We now have some more information on "the station of the cars" - <u>Radlo City</u>, Two tests were heard on February 4th on 7434

kHz and on February 25th on 7483 kHz, both in USB mode. The transmitter runs on 50 W and the antenna is a half-wave dipole connected to an ATU (antenna tuner unit) which gives maximum SWR ratio. According to several sources, the station comes from Germany. Address. Wuppertal. POP SPZ SRS

Radio Communication International from Germany celebrated their first anniversary show during Easter. In fact, this broadcast was their first with some "real" programming. One week later, they were heard again on 6285 kHz and in May they had a live transmission on 48 metres. The format is greatest hits from between the 70's and the 90's. In April, they also began a North American service via the facilities of NAPRS on the 6955 kHz outlet. The operator says there are also plans for mediumwave broadcasts. Power at present is 10 W, although I thought they were using at least 50 W – have had some great reception of the station the past months! SPZ

The studio of Radio Communication International.

Radio Dr. Tom was a slightly delayed April Fool's joke that was carried out on Easter Sunday on 6255 kHz. The original Radio Dr. Tim was imitated in a very alike manner, some listeners didn't even notice it was a spoof!! Just like the operator of Dr. Tim, a dark German voice was heard, announcing the address once or twice every minute. For certain people, malicious pleasure is the

A classical station within Free Radio, European Music Radio, made a rather surprisina return on February 11th with their 20 years anniversary programme! Fine signals were reported from most parts in Europe. The founder of the station, Barry Stephens, was heard with a brief station history. It all started off in May 1976 and later became one of the 'bia' pirates of the 70's. In November 1980, the station was raided which became the beginning of the end for EMR, whose members also faced problems with time to make the programmes and find reliable relay stations. The official reason for the closure in 1982 was "bad conditions", though, Another famous member of EMR, Roger Tate, made an attempt to revive the station in 1987, but he failed to gather the old members and EMR disappeared once again. The recent transmission was most probably a one-off, but who knows, maybe we'll see them in five years again, when EMR gets 30. Please note that the former Box 65 address is not in use anymore. Mail is returned from SPZ SRS there.

One of few Swiss pirates during the history of shortwave piracy. Sound of Switzerland had just a few broadcasts in the mid 80's. The QSL is from 1985.

After four years of absence, The Fox AM returned on March 3rd on 6287 kHz. A phone-in programme was held by Johnny Walker from Radio Rabbit International and Michael Scott from Radio Vanessa, and the Venlo address in Holland was announced. Unfortunately, the DJs said they have very little time for shortwave broadcasting, so not many broadcasts can be expected in the

future. The station also tried 6289 kHz on the Saturday night and announced a phone number in Denmark, but no-one rang. On the Sunday however, there were note less than 13 calls! Power was 25 W. In a recent letter, the operators tell they got 31 letters for this surprise broadcast and future broadcasts might take place on 76 metres.

Radio Fusion International is now officially using the old Crazy Wave Radio Mainz maildrop, as announced in the last broadcast on Easter Sunday on 6200 kHz. The station received only a handful reception reports for the broadcast, but this can be easily explained by the low audio the station put out. In a recent call with operator Jolly Jake, he said "All troubles should be sorted out till our next broadcast which might be aired on June 16th or on a later Sunday in June or July. The low modulation was not the only problem during the broadcast. I also had problems with the audio amplifier which was eliminated by some strange magnetical phenomenons. When I plugged in the headphones into my receiver, a security circuit in the amplifier was activated and the audio totally disappeared! Now I'm aware of the problems and ! think you should have an excellent reception of my signal next time." At present. Jake can go on two frequencies in the 48 metre band, 6200 and 6260 kHz, but more crystals will be bought soon. He is still looking for a new frequency in the 48 metre band, but 6200 kHz was very clear on the last broadcast, so that outlet is a strong candidate for future broadcasts. The power of Fusion is at least 200 W which should entitle it the strongest pirate in Scandingvia, Address: Box 411131, 55068 Mainz, Germany,

Israel. We have some really hot news from the Free Radio scene in Israel. A couple of weeks ago, the airport of Tel Aviv had to be closed due to severe interference from a local FM-pirate. Many planes had to be redirected to other airports in the vicinity. During the Jewish feast "Shavuot", the Israeli government had "planned to raid the offshore station Arutz 7 while they had intended to lie at anchor in Ashdod during the two day long sabbath. However, the crew was informed in

time by a reliable source and they are still safe outside the territorial waters of Israel. SRS

Radio Junifirst was a one-off heard on June 2nd on 3915 kHz. It was a joint venture between the participants of the recent Gronau DX-meeting. The station can be contacted at Box 1732, 48578 Gronau, Germany. SRS

Radio KWFA (Kurzwellenfreunde Acternberg) is a new German operation noted on Sunday March 10th on 3985 kHz. A 30 minute show was hosted by the Free Radio editor Frank Neuss between 17.30-18.00, who informed the listeners about the next KWFA DX-camp. Address: Box 220342, 42373 Wuppertal, Germany.

The most extensive Free Radio project ever, Level 48, promise to be back some time this summer. The name Level 1 International was abandoned in favour of the original name, which is thought to be more familiar among the listeners. There will be broadcasts on both 76 and 48 metres during one of the weekends this summer. On the latter band, two frequencies will be used with different programmes and different stations, because there will be a total of 14 stations in the proiect this time, and there are some really interesting stations. From England there are Radio Free London, Live Wire Radio and Z-100, from Scotland Weekend Music Radio, from Sweden Radio Fusion International, from Holland Radio Torenvalk, Transatlantic Radio and Radio Tonair and finally from Germany we have Radio Benelux, Speedwina Radio, Süd West Radio, Pirate Freaks Broadcastina Company and Crazy Wave Radio, Address: Box 220342, 42373 Wuppertal. Germany.

Radio Marabu said they would be on Internet by June 1st. However, as I write this it's June 9th, and there was no Web page available. The supposed address is www.dma.be/p/amphion/sztuka/marabu.html.

SPZ SRS

Radio Mousehunter was a spoof station heard on Whit Sunday on three different frequencies at the same time (6207, 6250 and 6300 kHz), but with different programmes!

Well Hans of Radio Torenvalk, who do you think we suspect is responsible for this?? Contact address is Box 94, 7038 ZH Zeddam in The Netherlands.

Another Sunday broadcaster on 76 metres is Mystery Radio from Italy. They were heard via the IRRS on 3985 on March 10th in the afternoon. A female DJ presented the show and welcomed reception reports to the Wuppertal drop.

India's first shortwave pirate, IOBS, made one or two broadcasts in the late 80's over a European relay station.

Radio New World made an acclaimed return broadcast on February 11th, Frequencles in use were 6276 kHz and 9241 kHz, although the latter wasn't audible in here in southern Sweden. The programme started off with the "Dallas" theme at 10 UTC and then followed a number of jocular features. The project is a joint venture between Radio Torenvalk and Radio Tonair, both from the Gaanderen area, who first started this operation back in 1988. Any of the following two addresses can be used: Box 94, 7038 ZH Zeddam, The Netherlands (Torenvalk) or Box 21, 7010 AA Gaanderen, The Netherlands LAY SPZ SRS (Tongir).

Ozone Radio International announced a new programme schedule recently: 11.30-12.30 Live show with Mr. Ozone (heavy metal), 12.30-13.45 Gary Steven's show (golden oldies) and 13.45-15.00 Not Just Jazz Show with 79 year old Robbie Robins (no doubt the oldest Free Radio DJI). Ozone is on the air each and every Sunday either on 5800, 5810, 5824, 5930, 6210, 6245 or 6275 kHz. A long list of frequencies to check

out there! The power is 80 W. Address: 55D Chester Road, London N19 5DF, England.\$R\$

Radio Red King is a new addition to the shortwave band, but for those of you who listen to mediumwave this is a well-known station. It is run by 41 year old Wim who lives near the German border. Both 76 and 48 metres have been in use since February and a new powerful 500 W transmitter is under construction which will be used for both mediumwave and shortwave. Address: Box 73, 7160 AB Neede. The Netherlands.

A frequent broadcaster from Ireland in the mid 80's: Radio Skywave International.

Do you want a trip of nostalgia? A new Callfornia-based station called Rock-It Radio offers a very special music with a selection of rare releases of singles from the 50's and early 60's! The transmissions can be heard over IRRS on Saturdays 11-12 UTC on 7125 kHz and 20-21 UTC on 3950 kHz. There is an impressive collection of 5000 EP's, 1200 LP's, 100 demo tapes and 900 CD's that await to be played over the air! This must be a dream for any fan of golden oldies! The address to write to is Box 5617, Ventura, CA 93005, USA or on Internet: RockItRad@aol.com.

<u>SRS - The Swedish Report Service</u> offer Free Radio stations own Web pages for the extremely low price of 3 IRCs for the rest of 1996!! You can get up to 100 kByte and have smaller graphic images too. Contact SRS at Östra Porten 29, 442 54 Ytterby, Sweden.

<u>Radio Torenvalk</u> from Holland said he would start broadcasting on 6400 kHz with a 2nd and/or 4th Sunday a month schedule. However, nothing has been noted on the frequency so far.

USA. We have a special US column, but I'd just like to report on the exceptional conditions towards North America at present here in Europe. Lots of stations have been heard recently and the most successful frequency is 6955 kHz where a number of vankees have been logged. Lars reports he heard Radio Fusion Radio on May 27th on 6955 kHz with rap music and an address announcement of Box 28413, Providence, Rhode Island 02908, USA. Other stations heard by Rainer and other Euro listeners lately are Radio Free Salvation, Radio Free Speech, WRV, JTA Radio and North Jersey Coast Radio. WLIS, that was heard in mid May, reports they have received reports from Spain, Sweden, Scotland, England and Germany! Congrats to all successful yankees and all listeners who have made these nice DX-receptions.

LAY RB SRS

Radio Waves International have a nice Web page which you can find on www.imaginet.fr /~rwaves. Latest news and a station story can be found there. Check it out! SPZ SRS

The QSL from long-running and popular Radio Freedom International from Scotland. A return was made in 1989, but only for a brief period. The station has been silent since then.

US PIRATE SCENE

Chris Lobdell
P.O. Box 146
STONEHAM
MA 02180, USA
75720.253@compuserve.com

Hello and welcome to another edition of the US Pirate Scene. Things here in North America have been busler than ever. The FCC is busy sitting down local offices as they institute a new automated monitoring system. Pirates on the 43 meter band have been operating with seemingly unrestricted schedules these days as the FCC seems unconcerned as long as they don't cause interference with other services.

KDED - The Voice Of The Grateful Dead, originally said they were stopping operations after the death of Jerry Garcia. Now the station is more active than it ever was. Since March it seems that they've been on every weekend either with their own shows or with relays of studio pirates. KDED's 1 kW SSB transmitter makes it from their West Coast location to the East Coast with ease. The best time to try for them is between 0300-0500 UTC on 6950/6955 USB.

The Alan Masyga Project was a station named after a pirate DXer whose handwriting is so bad, it's just about unreadable! This station popped up on January 21st at 1400 UTC playing music by the Allan Parsons Project. They announced Mr. Masyga's home address for reports! Allan was quite upset about this as he had no involvement with it! QSLs have recently been received for loggings in the ACE and Pirate Pages.

<u>Cell Phone Radio</u> is a new pirate which rebroadcasts actual conversations between individuals using the cellular telephone net-

work. Most transmissions take place between 1400-1600 UTC on Sunday mornings on 6955 kHz. One call involved a husband and his wife discussing his affair with another woman.

Jerny-Rigged Radio is a station with a name problem. When it first aired, the echo in the AM audio was hard to understand. Some people thought it was Blue Ridge Radio because they announced their maildrop as Blue Ridge Summit. Veteran pirate DXer George Zeller thought it was Great Horses Radio because of a segment from the old talking horse TV show, Mr. Ed. The program featured Ads for Radio 2000 which could pick up all the pirates and Leprecondoms. The QSL sheet was interesting, it spelled out the station name in flags, using the semaphore alphabet.

Mystery Radio has been seeing a lot of airtime in the past few months. This pirate plays a lot of electronic synthesizer type music with very few station IDs. Because of this, many people who have heard it, list it as unidentified. Their QSLs resemble old post cards and are quite attractive. The last few broadcasts of Mystery Radio in May included more talk by the host, The Shadow, so perhaps we'll be hearing more dialog from this mysterious station in the near future.

PRO - SEX PRO - DRUGS PRO - CREATION ANTI-MONKEY SPANKING STATION

HIGH TIMES RADIO

NAPRS - The North American Pirate Relay Service. Good ole' Dick Pistek was as busy as usual relaying Europirates right and left! In February, the co-produced Northern Music Radio - Underground Radio show was aired. The month of March found Sunshine Radio International and Northern Music Radio relayed. During the month of April, the Radio Titanic International "Titanic On The Rocks" show and two broadcasts from Sweden's Starshine Radio were heard. Does anyone really like to hear a drunk Kim Hawk singing along with the records? I don't know! The German pirate Radio Communication International was relayed in May and heard all the way to Germany.

The North Jersey Coast Radio made a comeback after a couple of years. Station DJ Bruce DeVito was heard on May 18th around 2300 featuring music by Donovan and asking listeners to write about their experiences at nude beaches.

Partial India Radio is a new pirate/parody of All India Radio. They were heard on February 3rd at 2330 with two Indian sounding male announcers, Sanjay and Harold Krishna. They made fun of reincarnation, saying the across Jane Mansfield had been reincarnated as the cow used in the Radio Botswana Interval signal! Their QSLs show parts of India, not all of India. Let's hope we hear more from this funny station!

Along with NAPRS and WREC, the most active station during the first five months of 1996 has to be the station run by Bill O. Rights, called Radio Free Speech. This station is known for it's professional operations which includes comedy by the Reverend Holy Moley and commentary by Earl Pitts. Fake shows with conservative talk host Rush

Limbaugh advocating masturbation and a send up of Paul Harvey have been heard. The most amazing thing about this station is its transmitter. It's an AM only 10 watt solid state transmitter made by Radio Animal called a "Grenade 40". Smaller than a case of cigarettes and run by battery power, these transmitters offer excellent modulation. RFS has a dipole cut to exactly 6955 kHz and is heard throughout the eastern half of North America. One correct reception report has even come from California.

Razorback Radio is another one of those "redneck" type stations, this time making fun of President Clinton's home state of Arkansas. They were heard on February 3rd at 2305 with announcer Ferrel T. Hoss playing Country and western music then joined by Bill E. Hogg who was feeding the pigs. Lots of beer Ads and a "Do The Clinton" song were featured.

Radio One made it's first broadcast on March 31st on 6950 kHz using a rebuilt and modified Heathkit Apache transmitter. They are a very slick operation, programming mostly oldies with a pro sounding announcer, calling himself Bobaloo talking with a Southern accent.

Radio Two is a semi-parody of Radio One! They were first heard on May 5th, also on 6950 kHz in the AM mode. Their DJ, calling himself "Yabba-Dabba Do" claims to be broadcasting from the junkroom of a 4 bedroom house, His kids can be heard yelling in the background. Yabba says "We May Not Be Radio One, but we're still gonna have some fun"

The <u>Voice Of Juliet</u> is a new pro-feminist station run by a woman. The station first started

operations on March 10th at 1500 UTC, Juliet did a nice comedy segment called "cannibal cookbook" which featured such delicacies as "penis prima vera" and "scrotum soufflé". On another show she put that chauvinist He Man of He Man Radio on the rack and then beheaded him in a guillotine! The Voice Of Juliet starts where Plrate Jenny of WYMN left off.

WBYR/Brickyard Radio was first heard on March 9th at 2300 playing Rap Music from the Brickyard. I guess you could say this station features an urban contemporary rap format.

WREC/Radio Free East Coast has been the most active pirate during the first part of 1996. P.J. Sparks recently celebrated his third anniversary in March with a series of special broadcasts. Last year the station updated their old AM transmitter and added a new SSB rig. Now P.J. can be heard Coast to Coast with the slogan "WREC, We Rock The East Coast". His recent relays of Radio Marabu, WLIS and MARS (The Montana Audio Relay Service) were heard in Iceland, Sweden and Germany!

WWWW/4W Radio is a new one heard on February 10th at 1830 playing sexually oriented rock music by Nugent, Brittny Fox and the like. The gruff voiced announcer didn't

have much to say except announce the address for reception reports. Blue QSL cards appeared with WWWW across the top. The station has gone back into hiding.

<u>XEROX - Radio Duplicado</u> made its annual April Fool's Day broadcast with Host Bart Sambo heard on both March 31st and April 1st. Programming featured a Jamaican reggae show, Peruvian folk music and George Zeller discussing pirate radio at the Winterfest. XEROX was also relayed by <u>Radio Titanic International</u> on 6245 kHz. Over 20 reception reports were received from mostly German DXers.

Transatiantic reception became evident in the middle of April and has continued most every weekend since. Many North American pirates have been heard between 2300-0100 UTC in Germany, Iceland, Scotland and Sweden on 6955 kHz in both AM and USB. These conditions should continue until September. What about Europirates being heard in the USA? Well, the Dutch pirate, Radio Blue Star was heard in late April around 2200 on 6297 kHz. Come on you Europirates, how about some more shows that we can hear!

Bye Bye! This is my last US Pirate Scene column. My workload and other family responsibilities have limited my free time. It's time I turned it over to a new individual who can devote the time required. It's been fun.

While there has been no offshore radio station operating in Europe for over five years. offshore radio is thriving in one part of the world. For fifteen years the Voice of Peace, was the only offshore radio station operating "from somewhere in the Mediterranean" otherwise known as off the coast of Israel, In October 1988, she was joined by Arutz Sheva, broadcasting from the MV Hatzvi. Five years later, in October 1993, following the Israeli/Arab peace accord, the Voice of Peace closed down and her ship "Peace" was scuttled and sunk by station owner Abie Nathan, who felt that now his peace mission had been realised, there was no longer any need for the radio station.

During the 1990's the Israeli radio scene became somewhat confused, with numerous pirate stations setting themselves up on land, some claiming to be operating from ships offshore. Some did indeed operate from small boats, while several owned small boats which they claimed to broadcast from, although actually operating from land.

Radio 1 started in January 1991, from the MV Polaris, anchored off the coast of Haifa. They broadcast on 105.3 MHz. Radio 1 closed down at the end of 1994, in preparation for the tenders for local commercial radio in Israel. Radio 1 won the tender to broadcast to the Haifa area, opening as a licenced commercial radio station in October 1995.

Radio Hof (Beach) opened in September 1993. They broadcast from the MV Hof anchored off the Tel Aviv coast on 102 MHz FM. It was a station mainly for teenagers. Radio Hof was closed down in April 1994, because it was discovered the ship was just a front and that they were really broadcasting from land.

Radio Gal (Wave) broadcast on 101.8 from off Tel Aviv. They started off as a land based

Radio Hof. Started in September 1993, this station broadcast from the MV Hof anchored off the Tel Aviv coast on 102 MHz FM.

station, with a very similar format to Radio Hof. When Radio Hof disappeared, It seemed like the Radio Hof crew had taken over Radio Gal, jingles and format were exactly the same. Sometime in September the station went offshore and is still broadcasting. They also have a second FM frequency of 101.1 MHz.

Galei Hayam Hatichon (Mediterranean Waves), started broadcasting offshore on Friday 27 October 1995. They were on the air for a total of three weeks from the MV Kajun on 95.1 FM, before they were closed down by the police and Ministry of Communication officials, who claimed they were broadcasting from inside Israeli territorial waters. The ship was boarded and broadcasting equipment confiscated. The station immediately went to court, trying to get their equipment returned. This was probably academic as on 23 November, the ship ran aground on the Tel Aviv coast and was so

badly damaged that it was declared unseaworthy.

Galel Hayam Hatichon. Their ship ran aground on the Tel Aviv coast and was so badly damaged that it was declared unseaworthy.

Arutz Sheva are the longest running of the current Israeli offshore stations, they broadcast on 711 and 1143 kHz AM and 98.7 and 105.2 MHz FM. They are on air 24 hours a day, except the Sabbath. The station now has a home page and daily news service on the Internet. The world wide web page gives some background on the station and includes two colour pictures of the ship and one of the studio. Check it out on http://www.jer1.co.il/media/arutz7/index.html

Arutz 2000, an ultra religious group, have been operating a land-based pirate station in Tel Aviv. During last year, stories began circulating of an offshore station being fitted out in Portsmouth in the UK. This was based on a former lightship, later renamed King David. The ship had been purchased by the Arutz 2000 group, and arrived off the Israeli coast in mid-May. At the time of writing, the land based set-up are making on-air appeals for money. They are expected to go offshore very soon, assumedly when they've raised enough money.

All pictures printed with permission by Offshore Echo's.

Arutz Sheva: The longest running of the current Israeli offshore stations.

ANGEL FM-7HE RATO

Tony Smith 34B Drift Road, Clanfield Waterlooville Hants POB CJL UNITED KINGDOM

The whole mess of our raid and the things that led up to it were predicted by me in December (read section on Pulse FM in December FRNSEM mag). The Angel crew and the Good Vibes crew met in early December when we heard that RSL Radio Victory were going to be broadcasting over Christmas. We decided that as Angel and Good Vibes was aimed at a different audience to Victory we would not close down for the month as we had always done in the past. I gave the Good Vibes transmitter a thorough overhaul to ensure that its 106.8 signal would not cause any interference to Victory's 107.8. Good Vibes decided to do just weekends while we at Angel ran 24 hours a day, 7 days a week.

During December a Station called Pulse Angel FM came up on 107.3 for a coupled of eve- after final nings, they constantly swore, advocated the **broadcast** use of drugs, and even worse, splat- Pirate station tips tered all over Victory's off DTI itself in a bid signal. The guy who Good warned Pulse of the problem they were time. causing to us all, Pulse told the Department of Trade stopped the swearing but the splatter continued. Radio Victory legal and apply for a licence. put in an official but instead of just splatter from Pulse the also accused Good tion, which has broadcast for Vibes of pinching their ence of about 2,000 and had to listeners and Angel of build up a reputation illegally pinching their advertis- munity needs another station. ing, so at midnight on He said: 'If we get prosecuted we won't be able to hold a

Police raid

to win licence.

Vibes Government officials raided a pirate radio station as it broadcast from Clanfield for the last

> Angel FM organisers had and Industry that the programme yesterday would be the last because they wanted to come off air so they could go

But as DJ Tony Smith was saying goodbye to listeners at complaint to the DTI 11.30am, two police officers and four DTI officials raided the Clanfield studio, seizing £4,000moaning about the worth of equipment and questioning four people there.

Mr Smith claimed the stathree years, had a regular audibefore it could prove the com-

New Year's Eve the DTI licence for five years.

smashed down the door of Good Vibes' studio (which was unmanned at the time) and took their equipment.

Angel continued to broadcast until midday the following day but we decided to close down just in case the DTI had been forced by Victory to raid us as well. As it later turned out Angel was, yet again, going to be left alone. If we had known this at the time we would have kept a low profile for a while but many of our listeners wrote to the local newspaper complaining about Radio Victory and this threw us into the spotliaht. Radio Victory invited us onto their station to put our case to DTI, Licencing Authority etc. As it

community radio licence just for the Clanfield area but to do thought the best way to do that was to provide a service.'

The raid came after Mr Smith took part in an on-air discussion about illegal transmissions on Friday at the legal Radio Victory studios in Fratton Portsmouth

Radio Victory, whose 28-day temporary licence came to an end on Saturday, is applying for warrant to raid us, so I full-time broadcasting licence for the Portsmouth area and had called for a clamp-down on illegal trans-

missions.

Carl Landsbert, technical director of Victory, said: 'We have spent most of our 28 days on Sunday and try for chasing pirates rather than getting our advertising revenue in to fund the station."

DJ Tony Smith

'We are trying to get a local hoppens the programme wasn't so that you need publicity. We much a debate as a 'slag off Angel' show. but during it I foolishly said that Angel would be back on air the very next Sunday. One hour later the DTI act a told the local officer. who had always been really good to us, that we would close down the new long-term community licence, but that we would definitely be on on Sunday to say goodbye to our listeners. We went on at 10am Sunday 14th January and were raided at 11.17am. The DTI only took one record out of 14 000 (Gary Glitter which was on the turntable) but they did take all the equipment.

The raid followed an on air discussion programme about pirate radio on RSL Victory. During the rather poor attempt at a topical discussion programme, Victory presenters and management accused Angel of stealing their advertising, of corrupting minors, of being rude and petulant children, etc etc. The feedback I received about the programme was that Victory proved that they are only in it for the money. That they know

Mark Kina hostina a show during the final transmissions.

nothing about Angel and the way it is run. And that they are trying to turn a 28 day local community RSL into a countrywide station. I'm very surprised the authorities allowed them to get away with this but once again it seems that money talks louder than good Intentions. Victory failed to get the desired audience figures and they failed to get the desired advertising revenue, unfortunately Angel became the scapegoat for their problems. We certainly won't let this happen again.

The warrant to raid Angel was issued one hour after the Victory debate and was kept on hold until our return to the airwaves at 10am on the following Sunday. We were fully aware of the risk we were running but we felt we had to broadcast a final closing thank you to all our listeners.

The reports of the raid in the press the following day mentioned a figure of £4000 worth of equipment being confiscated. This was slightly wrong as this figure actually refers to the replacement cost, the actual cost of confiscated equipment was nearer £2000. We have already started buying new studio gear and currently have two new Soundlab record decks and a broadcast auality microphone. We still need a 10 channel mixer. two CD players, two tape decks and lots more...so if you have any spare pennies, £5 notes etc. for boosting the Angel funds, all would be gratefully received. We are getting good quality studio equipment because we have given up our pirate operations and are now only interested in obtaining a licence. therefore we do need aear that is aoing to produce top quality sound 24 hours a day. If anyone has any ideas for money raising events, please write to 34B Drift Road, Clanfield, Waterlooville, Hants PO8 OJL.

We have put in a proper formal bid for an 8 year community licence to cover approximately the same area that our pirate station broadcast to. We've done a population census for the Licencing Authority which shows a potential listenership in the main coverage area of 35 000 people. We have also sent the required maps etc., so now we can just wait until they aet round to looking at our bid. We've been warned that it could take up to a vear. Ah well, it will give us a chance to have a rest and to plan the future without the sound of constant music blasting round the house 24 hours a day!

Station manager Weird Beard in Angel FM's studio during the Christmas broadcasts 1995. Listeners' Christmas cards hang on a string in front of the window.

CLARK'S EXPERIENCE

Tony Smith 34B Drift Road, Clanfield Waterlooville Hants PO8 OJL UNITED KINGDOM

A few days ago Angel DJ Paul Clark received a visit from Mr Russell, a DTI officer. Paul was asked to answer questions about his work with Angel while Mr Russell wrote down the answers in the form of a statement. Mr Russell informed Paul that he was not going to be prosecuted for working on an illegal radio station. This is exactly what we would have expected as Paul only worked for the station for a relatively short period and it is also his first offence. But it seems that Mr Russell gave the impression that prosecutions are definitely going ahead against Weird Beard, Hippy Chlck and Mark King. I phoned our local Radio Investigation Agency officer (the one who has been present at both raids on the station) and asked him: a) why is Mr Russell telling other people we are to be prosecuted before telling us? b) How will the prosecution affect us obtaining an RSL or a full licence. The answers were quite interesting.

a) The paperwork relating to our case has not even been completed yet. So no one can say that the DTI are going ahead with a prosecution. b) If the DTI do decide to prosecute Angel staff, it is not a quick and simple matter. Even if a court case goes ahead the DTI still have to win it and right up to that point in time we are still allowed to hold an RSL licence. So basically the answer given to me was: "GO FOR IT".

I think obtaining an RSL would not only be good for the community and all our exlisteners, but also for ourselves. It would prove to the DTI that we are absolutely serious about our wish to become legal. It would be a good example on our commitment to community radio and boost our chances of getting onto the Radio Authority working list. It would give potential advertisers the chance to hear and use the station - thus giving us much greater financial stability and backing when a full time licence becomes available.

To prosecute us would in fact be a backwards step for the Radio Investigation Agency because we are absolutely committed to going legal but if we were successfully banned from holding a licence for five years (which is what a successful prosecution means) we would have no other option but to return as a pirate station.

Continued from page 44: Radio Baltic International – Going Legal.

came from Great Britain. It was quite embarrassing for the prosecutor when I mentioned that Radio Sweden International were broadcasting on 6200 kHz in the 48 metre band with much more power. A short while later, RSI stopped broadcasting on that frequency.

- So, did Radio Sweden International stopped broadcasting there because of your remark?
- Well, I don't know, but I guess that's possible.

- Is there any chance we can see you on the shortwave band again?
- Shortwave is very interesting to me. In parallel with my application to increase power on FM, I've also applied for a Ilcence on shortwave. I've asked PTS (Swedish counterpart to the British DTI or Dutch PTT) to investigate the possibility of amateur-based domestic radio, a cheap alternative to commercial radio. The way things are right now, broadcasting is simply too expensive.

PRESS INFORMATION

Level 48, Europe's biggest Free Radio cooperation, will be back on shortwave in the next future. Transmission will be aired on 76 and 48 m.

At the moment there will be aired also some information loops during the weekends on various frequencies for testing the transmitting equipment and to inform the listeners.

Here now the stations involved in this new Level 48 network. We are proud to say that Level 48 is an international cooperation between Free Radio Stations spread over whole Europe. The following stations are connected in the Level 48 network at this time:

England: Radio Free London / Live Wire Radio / Z - 100

Scotland: Weekend Music Radio

Sweden: Radio Fusion Int.

Netherlands: Radio Torenvalk / Transatlantic Radio / Radio Tonair

Germany: Radio Benelux / Speedwing Radio / Süd - West - Radio /

Pirate Freaks Broadcasting Service / Crazy Wave Radio

Of course there will be a new special QSL card available for the coming broadcast. Reception reports and comments to the programmes are always welcomed and will be verified by our QSL manager who normally replies within days after receiving the mail. Be sure that return postage (IRC or U\$) is included in your letters.

Level 48 - The Spirit of Free Radio!!!

ARUTZ 7: URGENT NOTICE

Dear Subscriber.

As many houses in Israel are preparing for the Jewish holiday of Shavuot, and the Arutz-7 ship was preparing to end its week's broadcasts and dock in Ashdod for the 2-day Holiday-Sabbath weekend, we received word from informed and reliable sources that Minister of Communications Shulamit Aloni and Minister of Internal Security (Police) Moshe Shahal were planning to send the police to raid the Arutz-7 ship, confiscate our broadcasting equipment and close down the station. The ship and the entire crew will remain outside of Israel's territorial waters for the duration of the holiday, despite the fact that they are very low on gas and water.

Arutz-7 is Israel's one and only independent national radio station (not government-controlled). At any given hour, the station's listenership stands at hundreds of thousands representing a wide and varied audience all of whom will not tolerate such extreme politically-motivated measures and limitations on Freedom of Expression. It is appalling to the Arutz-7 staff to see that in the final and most crucial week before Israel's democratic elections, the current ruling powers would attempt to arbitrarily silence a fully legal and legitimate voice.

Though several illegal radio stations which broadcast from the Tel-Aviv area endangered landing aircraft at Ben-Gurion Airport this week, the Director-General of the Ministry of Communications went on record several times to the Israeli media that Arutz-7 broadcasts did not constitute any interference whatsoever.

The planned raid is clearly reminiscent of the attempt, on the part of Ms. Aloni, to silence the station in the summer of 1995. Based on her false allegation that Arutz-7 had broadcast from within Israel's territorial waters, Minis-

ter Aloni sent the police who seized and smashed delicate equipment onboard. The Arutz-7 management easily refuted her allegation by pointing out that the date upon which she claimed that we had violated the law was within the nine days of Av, a period of mourning on the Jewish Calendar during which it is forbidden by most opinions in Jewish law to play songs. We had announced to our listeners for over a week that we would be discontinuing our broadcasts for the full nine days.

For the sake of preserving Israel as a democratic country including the basic right of Freedom of Expression, we call upon all fairminded Israeli citizens and friends abroad to contact government offices, embassies, and consulates to express their grave concern and outspoken opposition to the closing of Arutz-7. It is our prayer and hope that despite the differing opinions of the Israeli population, we will unite as one nation with respect, love, and tolerance for one another.

Being the eve of the Jewish holiday of Shavuot, no news report will appear today. Our next news report will be on Sunday, May 26. We hope that you will enjoy the article below which relates to Shavuot. We invite you to view our "Good News From Israel" web page http://www.jer1.co.il/media/arutz7/gross.htm which was updated yesterday.

On behalf of Katzele, Arutz-7's General Manager, and the entire staff, we wish you a healthy and happy Shavuot, and a very pleasant weekend,

To subscribe (free) to Arutz-7 News Service, send email to: listproc@virtual.co.il (type subscribe arutz-7 <your full:name>). For further information about Arutz Sheva's on-line services send email to: info7@virtual.co.il. To reach the news desk; editor7@virtual.co.il.

FRS SALES PRODUCTIONS X-MAS OFFERS

RADIO CAROLINE

In the period Oct. 6th- Nov. 2nd Caroline was broad-casting on 87.7 FM in London. One C-90 features Andy Brooks and special guest Hans Knot on Sun Oct. 29th 13.00-14.30 UTC. A 2nd C-90 features Caroline veteran Mike Ahearn October 6th doing the Breakfast Show 07.30-09.00 UTC. On cassette number 3 (C-90) Caroline's Opening Day with Johnny Reece. Price per cassette is DM 9.00/£ 3.90. All three cassettes cost DM 25.00/£ 11.00.

FRS-HOLLAND

Studio-coples of the FRS-Holland 15th anniversary broadcast Sun October 15th. Hear FRSH in full Dolby B stereo with Joop ter Zee, Stefan Kramer, Tony Mitchell & Peter Verbruggen. Almost 5 hours in superb quality on five C-60s...the music of the FRS ear 1980-1995....the Fact Files giving you a lot of background Info....many jingles from past and present. Price: DM 35.00/£ 13.90.

CAROLINE/MI AMIGO/ATLANTIS

This package of three C-60s contains the first day of Atlantis tests with Chr. St. John Dec. 25th 1973 (80 minutes) plus New Year on Mi Amigo/Caroline Dec. 31st '77/Jan. 1st '78 (100 minutes). Great radio from the 1970s in mostly good medium wave quality. Price: DM 20.00/£7.90.

Write to: P.O.Box 2727, 6049 ZG HEREN in the Netherlands. Payments in cash or via Eurocheque (Dutch Guilders/German Marks only!!).

US PIRATE FEATURES

The Voice of the Runaway Maharishi

Yolanda Lewis 87 Highbury Drive ELGIN, IL 60120 USA ACEPUB@aol.com

I've first heard the Voice of the Runaway Maharlshi back in early spring of 1994, only a few short months after the station debut on New Years' Eve 1993 – an event that became known to the North American free radio enthusiasts as The Pirate Radio Insanity #1. Back then, one could still get decent reception on 7415 kHz, so I sat mesmerized listening to about eight different stations that have taken to the air that evening. The Maharishi, host of VOTRM, was one of the most outrageous ones, and as such, stuck in my mind. After all, how often do you hear a bad Indian accent and sitar music on your pirate radio dial?

During the years that followed, I've heard the station several times, using frequencies of 6955 and 6969 kHz. Unlike other U.S. stations that broadcast on semi-regular basis, or take to the air for several weekends in a row and disappear for the rest of the year, the Maharishi comes on only every once in a blue moon. But with a little luck and patience, one can hear the station.

The Maharishi started his illustrious pirate career as a sidekick of Captain Ganja on Radio Free Euphoria. Free radio apparently had an appeal to the Maharishi, as he has produced twelve shows in the span of three years that followed. During the early shows, the Maharishi claimed that he ran away from the state of Euphoria and stole Captain Ganja's transmitting equipment. The early shows featured mainly the 60's rock music and some of the original features produced by the Maharishi – such as the Maharishi Facts and Figures that was dedicated to educate the listeners about the benefits of smoking and using Marijuana.

Several shows later, VOTRM has dropped the pro-marijuana format, and concentrated more on home-made comedy. Although

many of the early shows were relayed by other stations, such as NAPRS, RFE, or WREC, the Maharishi has finally secured his own transmitting equipment. Due to the fact that free radio, is still unfortunately quite illegal in the U.S. and the penalties can be stiff (Radio USA was fined \$17,500 by the FCC), the Maharishi changes the transmitting locations for each broadcast.

VOTRM transmitting site - 1995

Maharishi's programming has grown and expanded and each forty-five minute or one hour show is a pure treat. The Maharishi likes to poke fun at the amateur radio operators (hams), by announcing his own call-sign as KOOK. There are no sacred cows as far as the programming is concerned - everything and everyone is fair game. The host has claimed in the past to be the real father of the president's daughter, Chelsea Clinton. In a different show, the Maharishi was flying around the country on his hemp magic carpet, visiting and describing all the lady free radio enthusiasts. In vet another show, he asked all the ladies to send him some used laundry for scientific experiments of undetermined nature.

The 1995 Xmas show (#11) featured all Maharishi produced music – mainly keyboards and guitars, with the host betting out such tunes as "John Arthur is such a ladies man",

"The Incredible Nose" and "Jerry Coatsworth's Farm". Those of you familiar with the North American scene will no doubt recognize John as the editor of the "Veried Response" in the ACE, and Jerry as a prominent DXer and free radio enthusiast. The Maharishi advised the listeners to run out to Best Buy and purchase his show in a CD form – filed under "Maharishi Madness." Needless to say, this announcement has proven to be a pure hoax.

For those missing the seventies and the commercial advertisements, the Maharishi has produced and played such gems as "Maharishi Charms" (a spoof on the Lucky Charms cereal) and pirate radio calendar (featuring other male pirate ops wearing string bikinis).

Some of the Maharishi shows may be purchased for a nominal fee from DVS Productions, (PO BOX 452, Wellsville NY 14895), which doubles up as a mail drop for the VOTRM and many other North American stations.

The Maharishi has not yet made it to Europe (aren't you lucky?), but has been relayed by KIWI in New Zealand in 1995. This relay was not reported in North America.

Voice of the Runaway Maharishi offers an attractive tan colored QSL card for correct reception reports and relays. Unlike the normal return postage requirements, the tongue in cheek host announces that in order to receive a QSL you must send him one million American dollars, deposited in a psychedelic suitcase, with several harem girls thrown in for a good measure.

Other than the early effort with Radio Free Euphoria, the Maharishi sometimes teams up with his North American cousin, Michael Rah-

dot of Microdot Radio, Maharishi is especially piqued that Michael's program which originated in central U.S. made it to Germany and his did not. (Perhaps some of you European ops would like to help out?)

Maharishi also teams up with Bullfrog of **Bullfrog Radio**, and has produced some of the Bullfrog programming.

The last show alred by the Maharishi was on February 10, 1996 – it was his Valentine's Day special, with (you guessed it) love and parody songs produced and sang by the Maharishi. The show aired with output of 20 watts using a Knight T60 transmitter and a dipole cut to 6955 kHz. Reports were received from as far away as Maine and California.

When asked why he enjoys pirate radio, the Maharishi said "I hope to impress women, poke fun at those ops who take themselves too seriously and have some fun In the process."

The Maharishi plans to return to the airwaves in the late summer 1996, or "as soon as the conditions improve."

We all wish him all the best in his future endeavors.

CRIES FROM THE SANDPIT

Stefan Printz Tegelgårdsgatan 14 211 33 MALMÖ SWEDEN xtdspz@lmd.ericsson.se

Pirate Connection dismiss confusing article in Pirate Chat

In the return issue of Pirate Chat, the chief editor David puts forward some really controversial and remarkable comments on the current Free Radio scene. The summary of his ideas is that the shortwave stations are weirdoes, because they are not willing to "move forward" and abandon the 48 metre band in favour of "the terrific 76 metre band". At times I even wonder if he's talking about the same Free Radio scene I've always known or maybe David plays in his own little sandpit? I've been following the Free Radio scene very carefully for the past 13 years, written hundreds of articles and columns, been debating different pirate radio issues a number of times, but I have never read anything more stupid in those years. not even close to it.

In a Mister-know-it-all manner, David says: "Granted, there are some people who seem willing to comprehend what I have said about 76 metres but there is another hard-core group who seem unwilling to take any notice. Perhaps those people can tell me what the fascination is with tuning around 48 metres relentlessly on a Sunday morning when there is hardly anything to hear. Why not just listen to 76 metres instead, where propagation conditions are somewhat more reliable and where there are many more stations to hear?" And later on he says "Turning back to 76 metres, several people have said to me that they don't get very good reception of the pirates on this band, or it is always very noisy on the band. This is untrue! The reason that people experience such problems, is all down to the antenna! A good antenna says goodbye to a long list of problems."

Well, let me tell David and his disciples of 76 metres (if he's got anyone who agrees with him at all?) that I belong to this "hardcore" group, although I have indeed been

reading David's earlier articles on 76 metres. where he depicts the very same theme: 48 metres has had its golden days and now the pirate stations should come to their senses and put efforts to converting into the 76 metre band. David's articles are full of plain propaganda and there's not much substance in what he's saying. The only thing I can agree with is that 76 metres is a nice band and a good option for stations who make night-time transmissions. But it can not, and never will replace the 48 metre band. There are so many circumstances that favour 48 metres to 76 metres and I'm astonished that David neglect to mention hardly any of them:

- 1. The 48 metre band has been the undoubted number one shortwave pirate band for 25 years and there is lot of tradition connected to this band. You just can't under-estimate the value and strong influence of such a long time of tradition!
- 2. 76 metres is a band for night-time transmissions. You will never get many listeners to turn from convenient 48 metre day-time listening to inconvenient 76 metre night-time listening! Just look at how few reception reports the 76 metre broadcasts bring! I've heard several stations complaining about this, Live Wire Radio, Radio Piraña International, Starshine Radio and Radio Fusion International to mention a few. These were some of the pioneer pirates on the band back in 1992 and the conditions were better at that time than they are now. Another point is that most appearances on the 76 metres are QSOs and 99 out of 100 listeners dislike the thought of QSOs on the Free Radio bands. It might be nice for the operators, but it has a repulsive effect on the listeners. If 76 metres would take over the position of being the main band, it would have a disastrous effect on the listener figures.

They are bad as they are at the moment. Why making it even worse?

- 3. There are lots of money and many hours spent on building 48 metre transmitters. If poor signals were a problem, why not raise the bar and demand more power from the pirates? Stations with 100 W or more are heard with good reception even if the conditions are bad on 48 metres. Not to mention the DX-ers who listen with very simple indoor antennas. They could also improve their reception by building a halfwave dipole, or, if space doesn't allow that, using an active antenna. On 76 metres, many stations are using the AM on HAMtransmitters which seldom provides with more than 50 W. When reception is unfavourable (because it happens even on the 76 metre band, David!), usually this is not enough for good reception, at least not during day-time for reception of continental stations.
- 4. So, let's talk about conditions. This is the main thread in David's argument against the 48 metre band, I've heard many stations on the 76 metre bands the past 4 years the band has existed with pirates, but it's not my experience that the band is a good alternative to 48 metres during day-time. On the contrary, I have most times good to excellent reception on 48 metres. This is also true for the 76 metre band, during late evening or night-time, but as stated earlier, this time is of less interest. David says he heard Radio Blackbeard with a "thumping signal" on 76 metre on a Sunday afternoon with "only" 20 W. Well, let me tell him that I recently heard the very same station on 48 metres with a

fair signal here in Sweden with 2 W of power! I even managed to decipher the phone number that was announced over the air and called the operator, who hardly could believe the exceptional reception I had. And I could mention many more examples. True, at times conditions may be rather poor on 48 metres, but it's very rare that I receive less than 10 pirates on a Sunday here. In my oplnion British DX-ers have better opportunities of hearing pirates comparing to us in Scandinavia. They've got the British and Irish stations very close and the distance to the continent is also less. It would be interesting to know what kind of receiver, aerial and possible source of interference David has. guess his confused propaganda can easily be rejected by his own words on indecent antennas or bad receivers! Of course, I admit that conditions are not as good as in the 70's or 80's, but it has not deteriorated to the proportions that David describes.

It's truly amazing to see David almost weeping over the fact that the 48 metre band holds its strong position as the main Free Radio band. "We" are "unwilling to take any notice" he cries out. Well, I think many of us are listening to the speeches from David's soap-box and will continue to do so, I've enjoyed many of David's articles in the past, but now he's way out of all sensibility. And I can assure you, luckily things will not change the way he wants, because there are no major reasons for things to change. Besides, I can not see how anything of what David savs would lead to the better. Quite the reverse, it would destroy a long and exciting tradition of a still prospering 48 metre band!

PIRAÑANEWS

Greetings from South Americal

Radio Piraña International has now begun to "normalize" its activities after the move from Europe last year. We must say we are very sorry for the long delay in replying the reception reports, but we have been very busy with the move and also to re-establish us here in this South American country. Excuse us very much for this delay and we hope we can maintain the contact with our friendly listeners also from this part of the world.

We think (we know!) that R.P.I. will be heard in the future too. Maybe it would be a little more difficult for our European friends. For the North American listeners it will probably be easier than before. We have already been able to catch several NA pirates on 6955 kHz but without being able to identify them. Some of them have had poor to fair signal, but the lack of "good" IDs from the stations, or just because they have faded away when they have given IDs, have made it impossible for us to identify the stations. Note to the NA stations: Please give IDs more often!

We at Radio Piraña International give frequent IDs, in fact too often, professionally speaking. But as very active shortwave listeners, we nearly get crazy on a daily basis when trying to identify different stations. There are often stations with good signals giving IDs just once or twice an hour ore even less! I can tell you, you'll get crazy! A few months ago, I listened to a Bolivian sta-

Jorge R. Garcia Radio Piraña International Box 220342 42373 WUPPERTAL GERMANY

tion and I had to listen for over two hours before they gave an ID.

We started our broadcasts from our new QTH here in South America on December 3rd, 1995 at 2.00-2.40 UTC on 6955 kHz USB. This transmission was well heard in Buenos Aires which is over 1000 km away from here. In the last days of October we set up two dipole antennas, one for 6955 kHz and the other for 11415 kHz. In the future we will be active around 6955 kHz and later (probably in mid April) we will also carry out tests on 13950 kHz +/- 15 kHz for Europe, North America and elsewhere! Another frequency we will use is 6925 kHz with our home made plate-modulated and crystal-controlled AM transmitter we are currently constructing. The 11415 kHz outlet is also a possible frequency for our broadcasts.

As mentioned we have heard several NA pirates on the 6955 kHz channel. But we are sorry to say that we have not caught any European pirate stations yet. We think it is possible to hear Euro stations too, but the lack of European stations broadcasting at hours with good propagations to the NA and SA regions, is the reason for this negative result.

The best time for reaching our region is from around 0.30 UTC to around 3.00 UTC for Europeans on the 48 and 41 metre band. Also the 76 metre band could propagate at the same time, but the stations would need to have at least 100 W to reach us here, but, of course, you never know. I have come to this conclusion after monitoring the 80 and 40 metre amateur band, with quite good results on both bands at the times just mentioned.

In the next months \Re .P.I. will be active in the 6955 kHz region from around 2 UTC. It seems that the propagation to NA on this channel is best from around 3 UTC.

A LETTER FROM JORGE

Stefan Printz
Tegelgårdsgatan 14
211 33 MALMÖ
SWEDEN
xtdspz@lmd.ericsson.se

South America December 15th, 1995

Hello Stefan!

I hope all is well with you. Everything Is fine with us. Thank you for the nice issue of Pirate Connection, it was really a great pleasure to read PC again!

We have now get started down here and everything seems to be getting on well. We've had a slightly stressful start, but now it has calmed down and today we begin our summer vacation, which will last until the beginning of February!

By the way, I have already had a transmission!! It was a live broadcast on December 2nd at 2.00-2.40 UTC with 100 W on 6955 kHz USB. I only just had got hold of this transmitter and couldn't find the time to make a connection between the mixer and the transmitter. So I both spoke and played the music right through the microphone. It was also my intention to broadcast on 11415 kHz at 7 UTC, but this had to be cancelled due to problems with the transmitter.

So, you may keep an eye on the frequencies around 6955 and 11415 kHz. I have erected two dipoles for these two frequencies.

I have also tried to tune in to the pirates, but so far I have had no success. Well, except for one station I heard with continuous music on 6310 kHz on October 30th and another one on 6955 kHz LSB on November 5th with slow rhythm music and poor signal. Unfortunately, I got no ID for neither of these stations. Depressing.

I have some plans on building up my AM transmitter again, which I would use for 11415 kHz in the first place. After that, I have planned to try 6924, 15040 and maybe also a frequency around 4600 kHz. I have crystals for all these frequencies.

I can also tell you we have fantastic weather here. It's high summer and the temperatures peak to at least 30 C each day. Christmas is approaching rapidly, this is also noticeable here with all the Christmas preparations in our neighbourhood. I hope to be able to have a broadcast during Christmas on 6955 kHz USB, but I'm not sure yet.

Me and my whole family wish you a Merry Christmas and a Happy New Year, Stefan. I hope to get an e-mail address in January, then we can chat over Internet.

Jorge R. Garcia

RADIO BALTIC INTERNATIONAL GOES LEGAL!

Stefan Printz Tegelgårdsgatan 14 211 33 MALMÖ SWEDEN xtdspz@lmd.ericsson.se

A while ago, the operator Bengt Bengtsson from Gotland (Sweden's biggest island off the east-coast) was charged for regulat illegal broadcasting. Between spring 1994 and spring 1995 he ran Sweden's strongest pirate station. The broadcasts consisted mainly of relays of other stations, such as Radio Nord and German tape stations. I called Bengt to find out how things were and how the trial turned out.

- I recently read in a Gotland newspaper that you got a community radio licence after the recent shut-down of Radio Gute.
- Yes, that's correct. We're running a service with 20 W, just a few hours a week on 91.6 MHz. We mainly concentrate on nostalgic music and the style is similar to Radio Nord. We also have Lasse Karlsson from Radio Nord as a piece of the action. There are four mainstream stations here, so there's got to be an alternative.
- How do you feel about the outcome of the trial. I heard you were charged with a couple of thousand Swedish kronor? I guess you should be satisfied with that?
- No, I'm not satisfied! I was convicted and I will never accept that. I was sentenced to pay a fine of 60 times 70 kronor (4200 SEK) plus 300 kronor to the Foundation of Criminal Victims (Brottsofferfonden).
- So, do you intend to appeal against the district court's verdict?
- I've already done so. But the court of appeal refuses to bring up my case again. They think that there are not enough new circumstances that would change it. I thought we had quite some new matters to bring up, but I've also appeal against the sentence to the European Court of Justice.
- What do you think of your possibilities there?

 Well, there might be some slight hope. But I expect it will take long time.

In front of the huge mast from which Bengt has relayed stations such as Radio Nord and Radio Titanic International.

- Talking about the trial again, were there any substance in the accusations of complaints from other countries?
- There was only one remark and that one

Continued on page 34.

LET'S START JAMMING

Torenvalk Technics Box 94 7038 ZH ZEDDAM THE NETHERLANDS

Every Sunday morning I try to get up as early as possible (which sometimes is not before 10 AM). After the breakfast I switch on my receiver, grab my notebook and listen out for unknown and well-known voices on various shortwave bands. And most of all, I tune in to Free Radio stations and their programmes. I think you will recognise yourself in this.

What lately seems to occur more often is the way the 48 metre band is getting crowded and Free Radio station jamming each other. There is only a limited space on this band, roughly frequencies between 6200 and 6305 kHz are used by Free Radio stations. On the 76 metre band the space is even more limited, some 50 kHz can be used between 3895 and 3945 kHz.

Most Free Radio operators are making a strong effort to come on the air on Sunday mornings, they spend hours in making programmes, jingles and keeping the equipment in shape. Sometimes several miles are driven to a secret spot in the woods, in rain and bad weather the antenna is hung up and the tape is started.

What a real shame it is when two or more stations are on the same frequency causing a lot of interference and without meaning to messing up each other's programmes.

In order to avoid this, station operators should get more in contact with each other and make better appointments as to when and what frequency a broadcast is planned.

I hereby would like to strongly advice to all Free Radio operators: if you are planning to come on the air, tell your "colleagues": on what time and on what frequency. Let's make the Free Radio bands a nicer thing to listen to.

SCOTLAND'S VOICE OF FREE RADIO

Impressions from a visit to Weekend Music Radio

Since I started my young "Pirate Life" back in 1993 I visited many Free Radio stations, mainly in Germany and in the Netherlands, but I never have been impressed in such a way from a station like Jack Russell's Weekend Music Radio. For over 16 years now, Jack Russell has been running the station and no voluntary end is to be expected. As far as I know, there is no other station on the air for such a long time serving the Free Radio spirit like WMR. This mainly is the great work of Jack Russell, who regards Free Radio more than a "hobby", which unfortunately only a few OPs are doing. The time Jack is spending to Free Radio is unpaid and this Is creating this unique sound of Weekend Music Radio. It is not easy for me to find the right words for describing this mixture of ingenious chaos and professionality that might be the secret of the sound of Weekend Music Radio.

The 150 W transmitter.

So let me start at the beginning: It all started after the last network broadcast as Level One International (now Level 48) when I de-

clded to visit WMR in Scotland. As always, it took some further weeks before Mr. Ise managed to go to Scotland. Finally April came before I started the trip "over there". After travelling around the Scottish beautiful Highlands we made an appointment for April 4th at the bus station of one of Scotland's biggest cities. But how would I recognise persons I only knew by their voices? It was planned that Dave Anderson (who started WMR in 1980 before handling over to Jack) and Jack should meet me directly at the bus, but there was nobody when I arrived. Suddenly the two guys came around the corner and I was a little bit faster in recognising them, due to Jack's special "Irish-Scottish" hair colour and beard. Later on they told me that the reason for the delay was another auv with a big bag, who they thought might be Chris Ise, although I really had nothing in common with that hipple, hi. The following hours were very exhausting for me, as we went directly from the station to the nearest pub where the afternoon till the "last order" was spent...that's Scotland! Maybe that is also the reason why I cannot remember any further details of this evening, only that Jack and me woke up the coming day in the living room in the house of Dave and his wife Grainne. The following days were spent, of course, with talks about radio in general, as Dave is now working at a commercial radio station in Scotland. Of course we also talked about pirate radio. I was really surprised when I heard all the stories of Irish commercial (!!!) FM pirates for whom Dave worked for vears back. It was unbelievable that some of this stations used antenna masts with a height of more than 50 metres! Many of Dave's and Jack's pirate friends from this time are now working on legal stations in Scotland and Ireland.

On Good Friday it was time to visit the well

hidden "WMR-village". Everything is really WMR there! The evening started there with a visit to the "WMR-pub", which is the communication point In the "WMR-village", beside the WMR studio of course. It was really not easy to reach the studio on this Friday after joining the pub, as there is the world's most famous "WMR Pirate Trap". I do not mean the mad "WMR Killer Ducks" who in my opinion are better than doas in defending the studio against foreigners and the DTI, but the appr. 1.5 metre deep path going along the cottage in which the studio is hidden. So it was no surprise that I suddenly lost the around under me and fell over the edge, just like many offshore and landbased plrates hade done before during the years' of visits, and with laughs from half of the WMR village! The next big problem is to find the way in this cottage. If you are opening the door, the first you will see is 16 years of electronic rubbish mixed with tons of station mail coming suddenly down all over you. Then you finally are In a very chaotic and confusing studio.

self and Mick James, the mysterious DJ with the music from the 60's! But this is not the last trap on the way to bring WMR on the air, as there is also Jack's self-built transmitting equipment. Because of his profession as an electrician, he is very skilled in building transmitters, but the way in doing this is unbelievable. Although Jack's transmitters looks like crashed cars they run as if they had an own will. On the first afternoon the transmitter shown at the photo ran as normal with about 150 watts, but this changed over night when a capacitor blew up by a short but impressive fire work and the tx decided from then to give out 50 watts. Also connecting a coil for 76m on this tx is no problem, the only thing you need is the coil and some wood. Then connect this professionally with the tx by wrapping the wires together and the tx is ready for another band. Very easy, ask Jack!! By the way: Jack also established the Radio Stella transmitters for Jock Wilson on Ireland that ran there automatically until last vear when the Stella operator Jock decided

The chaotic WMR studio, Easter 1996.

There are really only two persons who can handle with the equipment there: Jack him-

to go to China.

So over the Easter days WMR was on the air for nearly 24 hours a day, since there also was a recorded programme running automatically from the forests on 6210.

One of the Stella transmitters built by Jack Russell. One of the parts near the 813 endstage tube is a beer-glass!

Another nice event was the start of the new commercial mediumwave station on Ireland, Radio 1521 where also some good friends of Jack and Dave are involved. Jack decided to take over 30 min of the first official 1521 programme for Weekend Music

WMR's antenna system

Radio and so this was heard all over Europe on 48m. Maybe they are still wondering there why they received a report on telephone from Chris in Germany who reported an excellent signal on 6210, much stronger than on 1521! But back to the WMR-QTH: Very interesting also is Jack's antenna system. See the picture below.

At least a dozen antennas for nearly every band are connected to trees of the other side of the river passing the WMR studio and maybe is giving a good reflection to WMR's radio wayes.

Inside the well-built 150 W transmitter with the "proffessional" coil on a piece of wood. This coil is used for 76 metre operation.

With such and more impressions, the time over the Easter days passed too fast and so it was time for me to go back to Germany. So let me say once again on this way thank you very much to all there. By the way: If you like to meet the WMR guys, why don't join the DX-Camp of the Shortwave Listeners Club Saar from the 16.-18. August '96 in Merchweiler/Saar in the South West of Germany. As usually, a lot of Free Radio OPs will be there. I really will be glad to meet Jack and Dave there again. Keep on doing the great work and keep the Free Radio spirit alive, Free Radio would be different without Weekend Music Radio!

ON THE MARKET

Stetan Printz Tegelgårdsgatan 14 211 33 MALMÖ SWEDEN xtdspz@lmd.ericsson.se

Free Radio Weekly is a new e-mail based Free Radio mag on the market, not available on printed papers. The newsletter is for the US market and should be sent out each Sunday at 16 UTC. For more information, write to piradio@usa1.com.

Radio News from Free Radio Campaign Germany, published twice a year. The spring edition is now available. Mostly offshore news, but also some landbased pirate news, all in German. Very high quality offset printing. A sample copy is yours for \$6, £4 or DM 9. Order from Free Radio Campaign Germany, Box 2209, 77612 Offenburg, Germany.

Offshore Echo's - the longest-running Free Radio mag and entirely about offshore radio. Lots of nostalgia, interviews, features and pictures. And some real offshore news, the little there is. The most professional and nice-layout mags of all. The latest issue is from April and contains news on Radio Caroline, a Laser 558 story and an extensive feature on the current offshore stations in Israel. Subscriptions: £19 (5 issues). If you live in Sweden, you can pay SEK 225 to postal giro account 64 60 67-9 (FRC Sweden).

Onda Caliente - the shortwave station that answer the first report for each broadcast with a QSL-condom! - is now also an electronic publication. Check out their interesting Web site on: www.mnet.fr/onda.caliente/index.html.

Can you believe it? <u>Pirate Chat</u> is back! This mag from England was silent for two years and the subscribers were left with no explanations and no excuses. Now, editor David has miraculously returned out of nowhere and the comeback issue is well-produced with some nice layout. However, it all was a disappointment to us at Pirate Connection. The concentration of Dutch medium wave pirates with three or four articles is simply too

much. I wonder what on earth David's English readers will think? There is also some unfortunate inaccuracy of information. The address of Pirate Connection mentioned is our old Lund address, not in use for over one year. Another example is the Radio New World project which is said to be a new one. As a matter of fact, this project first started off in 1988. The magazine need to mature and recover from the long absence. It's still a long way to reach the level of 1993/1994. For a mag claiming to be "the only mag to reflect the true pirate scene" and "the bia PC", we should have the right to demand much more. I'm sure it will get better though and then you might consider taking out a subscription. A sample Is £2 or \$4 which you send to c/o SRS, Östra Porten 29, 442 54 Ytterby, Sweden.

The newest shortwave bulletin on the market is <u>Sounds 'n' Signals</u>. Issued occasionally by Mr. Tequila, operator of Radio Amazonia, on a single A4 sheet with the latest info on the station and other Free Radio news in brief. Issue 3 was issued in December and the latest one, number 4, was out in April. Address: SRS, Östra Porten 29, 442 54 Ytterby, Sweden. 2 IRCs should be enough for a sample copy.

<u>SRS News</u> is the "must" bulletin for every serious Free Radio DX-er. It's published weekly and available on Internet, by fax or on printed papers. For more details, write to SRS, Östra Porten 29, 442 54 Ytterby, Sweden. Or why not have a look on their nice Webpage: www-pp.kdt.net/jonny/index.html.

Vogelfreles Radio is an interesting publication in German which can out last autumn. The book on 180 (!) pages gives a complete and detailed story of all active German and Swiss stations during the 1980's until 1995. We highly recommend this one! \$20 for Europeans and \$35 for anywhere else. Send in cash to Björn Quäck, Box 103113, 44031 Dortmund, Germany.

THE METEOR RAID

Rick Random Box 220342 42373 WUPPERTAL GERMANY

My station Radio Meteor was raided in 1995 and was also in court. Penalties were about 9500 Finnish marks in total.

Two policemen arrested me at my working place and then made home visitation with a THK radio inspector, but nothing was found. They took many albums of QSL-card and letters with them, but all were returned later on the same day. I had removed all "hot" material away a long time ago. They tried to find the transmitters, reception reports and other letters sent to the station.

They told me that they would make further raids to my working place and other possible places until they would find something, if I didn't tell where the transmitters were. I then decided to tell where the transmitters were hidden, 300 km away in my parents' house in central Finland. Two other policemen were sent to fetch the two transmitters and so they did, but nothing else. Other material were somewhere else in a secret place.

They had examined a lot of letters sent by myself to other stations and ERC Finland.

The studio from which all programmes by Radio Meteor was recorded. The station was raided in 1995 and is not likely to return.

They took me to the police station and took away my belt and cleared out my pockets. I was then locked in jail where I spent a few hours before examinations. I was very tired at this time and I fell asleep, although the cell had no padding.

and wanted me to explanations for them. In letters with "secrets" or possible evidences, I had used my nick name and in some other letters I had used my real name, they thought. The criminal laboratory showed that the letters had been written by the same

typewriter. I think that those letters were the reason for the raid, because it happened about one year after the latest broadcasts.

In the court I was prosecuted for felony against the radio law. The punishment for this is from half a year up to two years imprisonment. The copyright organisations also demanded 45,000 FIM for the music I had played. The court made the decision to convict me of offence against the radio law, but not felony. The penalties were the fine 2640 FIM, the fee to the witness (THK radio inspector) 519 FIM, rewards to the copyright organisations 3000 FIM with 16% interest beginning from December 31st, 1993, plus expenses for the representative of the copyright organisations 2500 FIM. Of course the transmitters were declared forfeited to the state. The good luck was the representative of the copyright organisations was the state prosecutor, the rural police chief and not high salary lawyers. I also defended myself without any lawyer.

Previously the copyright organisations tried to reach an agreement of 10,000 FIM, but I said no. Then they proposed 6,000 FIM, but I offered them 1,000 FIM. Of course they dlant accept this, it even irritated them so much that they demanded 45,000 during the legal proceedings.

All Radio Meteor transmissions came from central Finland, about 30 km south from Jyväskylä in my patents' house, where I had made my broadcasts since 1980. I also operated Radio Scanwood but those transmissions came from different places and by different operators.

After all I don't regret anything. At first it was more a fight for free radio, later it was more a nice hobby. It was always fun to be on air and receive letter from listeners.

I have no plans for the future, but the Wuppertal box is still in use for anyone who wants to write in. 73's & FFFR Rick.

Associazione Italiana Radioascolto A.I.R. Confirmed Pirate Stations Award

A.I.R. issues the "Confirmed Pirate Stations Award, available to DX-ers who have received confirmations from pirate stations and fulfil the award requirements.

The award is issued in four classes:

Class 1: 10 different pirate stations

Class 2: 30 different pirate stations

Class 3: 50 different pirate stations

Class 4: 100 different pirate stations

Send in a list of the stations, with the frequency, date and time, plus a handwritten signed paper which attests the authenticity of the data provided.

> The award fee for each class is 6 IRCs. Award manager is Bruno Pecolatto.

Send your application to: AIR - Associazione Italiana Radioascolto c/o Bruno Pecolatto, Via Soana 13 10085 Pont Canavese (TO) ITALY

THE LETTER-BOX

Stefan Printz Tegelgårdsgatan 14 211 33 MALMÖ SWEDEN xtdspz@lmd.erlcsson.se

It's a long time ago I published any of your letters. I receive so many interesting and encouraging letters by our readers and I think it would be nice to revive this column. There are also quite a few of you who have expressed your wishes to get it back. So, here it is.

One of the most well-known Free Radio listeners, Ian Biggar wrote: "Please send me a copy of Pirate Connection #13 for which I enclose 5 IRC's. I recently had a quick look at the magazine...and was sufficiently impressed to now order a sample copy."

Well thank you very much lan for your nice words, and I do hope you will find PC good enough to take out a subscription.

John T. Arthur of DVS Communications, Box 452, Wellsville, NY 14895, USA, writes: "I've occasionally seen a copy of PC in the past, thanks to our mutual friend Chris Lobdell. Your coverage of the Euro scene has always been quite a good, and your expansion of North American coverage is a great improvement. Congratulations on adding Yolanda to the staff; she is well informed on the US scene and is computer literate as well. She will definitely be a real asset to PC." Yes, Arthur, we'll now make a very serious attempt to reach the US market and I think PC #14 is a good start. We'll continue to recruit writers from the USA and you can expect even more features on the US stations and hopefully we'll also add a US log column in one of the next PC's. Let me tell you that John has an impressive collection of more than 375 programmes on tape. The list can be obtained for a couple of IRC's or a couple of dollars.

Our faithful reader Ewen Cathcart in Scotland applauds the last issue of PC: "Many thanks for Pirate Connection #13. An excellent read as ever! I see the 'other' PC, Pirate Chat, has returned after being away for two years! I assume by now you've seen the 'nice'

comments about you on page 20! To be honest, I hadn't noticed a mistake in your magazine until David pointed it out for all to see! ... We all makes mistakes so don't worry about it. David make an even bigger mistake by leaving us for two years! ... I guess the 'friendly rivalry' between you, David and Peter Verbruggen has now come to an end?"

Thank you very much for your great support Ewen! The mistake of re-printing the QSLcollection was unfortunate, but I guess quite a few people had a nice laugh at the joke "Fat Cat Ed prints wrong page". I thought it was quite funny myself, although everyone should know that I'm far from rlch. Perhaps part of the reason is that I have to take a few hundreds of dollars out of my own pockets to cover the deficits. As for the rivalry between the three biggest mags, I think we've always tried to have a friendly attitude towards the other mags. Just have a look on the FRS advert in PC #13 which was published free of charge! My point in my editorial a few issues back, was that the market is just too small for three mags and I thought we should put our resources together and create a new and much more comprehensive mag. Unfortunately, neither Peter or David were willing "to move forward" (using David's own words). So. I guess we'll continue running our own races.

Alan Pennington, who I had the pleasure of meeting last year during the EDXC event, is critical of the subscription rates: "It has taken me a long time to decide to renew because, although PC is a great mag, £19 or 40 DM is a lot of money for 5 issues (compared with our club magazine - sample enclosed - which costs just £14 for 12 issues in Europe - average 48 pages)."

Alan is not the first one to complain about our subscriptions. I'm aware of the fact that many of you think the rates are too large, and because of Alan's letter I have now decided to decrease the rates slightly for the European readers and especially the US

readers (in our attempt to reach more people). The reason why the rates are so 'big', is that our postage rates in Sweden are outrageous! I would guess that, compared to UK, they are twice or three times as much as what a 100 g letter would cost to mail in the UK. To non-Scandinavian countries, a single issue to send costs SEK 16 and to the USA SEK 20 and that's more than it costs to print the mag!! Once again, remember that I don't make a profit out of the magazine. It's all done out of my enthusiasm for Free Radio, and if I can get more subscribers by reducing the subscription costs, I'm willing to do so.

At least I have one reader that thinks the subscription rates are reasonable. It's Martin Schöch from Germany who says: "Reducing subscription is always a good idea (my subscription expires with #14, so I have to pay next time...). But to be honest, PC is worth 40 DM for 5 issues. 8 DM for one issue is cheap compared to the professional maas available here in Germany on the radio market." Let me also take the opportunity now to mention a new pirate address list that Martin has put together. It's an outstanding work on 15 big sheets containing over 1400 shortwave and mediumwave pirate stations from all over the world!!! Unfortunately, the current format with very small fonts made publication impossible, but Martin has promised to work on a special format for the September edition of Pirate Connection. However, if you want a copy of this list right now, write to Martin at Geusaer Strasse 88-5-102, 06217 Mersebura, Germany,

Finally, I had a rather angry letter from Derek a few months back regarding PC #13: "Thanks for Pirate Connection. Interesting. I'm glad I did not contribute <u>directly</u> (although notes suggest I did) to the Black Book. Too many errors and wrong addresses for Holland Dutch pirates!! MW gets the brush off again! (Quote from Black Book: "I have deleted the MW only or FM only entries.") PC is also now 99% shortwave. Think you should retitle #13 "PC + SRS News" ".

Well Derek, what shall I say to you? You've been a great supporter to Pirate Connection with your mediumwave news and address list and I do hope you'll continue contributing with your invaluable news. I think you are unfair to Mary Jo. I think she's done a great job with the US pirates and a fairly good job with the Euros too. Remember she's entirely dependent on us Euro listeners, you, me and others, and that we send her continuous and correct information on the Euro pirates. And I'm sure the list will improve considerably in the next edition. However, as I just mentioned, Martin Schöch has written a new, complete address list that we might use instead. He will also contact Mary Jo for a possible co-operation between the US and Euro pirate lists. Concerning your digs about mediumwave, I can only agree with you. The problem is that no-one seems willing to take over the mediumwave column since you decided to stop writing it. I can assure you, if we only receive material on mediumwave, it will be published. Remember that Pirate Connection are dependent on contributions from our writers and if you are not satisfied with the result, you are more than welcome to start writing for PC again. We try to please everybody and, as a matter of fact, I think we are quite successful in doing so.

Well, that finishes off this column. Please continue writing in to me with whatever you want to tell about PC or any pirate related issue.

FREE RADIO TECHNIQUE

Torenvalk Technics Box 94 7038 ZH ZEDDAM THE NETHERLANDS

How to improve reception on shortwave

In this article we would like to give you some suggestions on how to improve shortwave reception.

First let's make something clear; a great misunderstanding amongst shortwave listeners is the belief that a greater sensitivity of the receiver will always increase the number of stations that they will hear. Maybe this was true some 25 years ago, but any modern type of receiver has enough sensitivity in combination with a longwire or an inverted-V.

The first problem that occurs is the "soup" that weak stations seem to disappear, especially during the evening which is caused by the receivers having a too small dynamic range. This can be solved when using a proper preselector. From our point of view a preselector is always recommended even when using highly sophisticated receivers such as JRC NRD-535 or a Kenwood R-5000.

A nastier problem that listeners have to deal with is interference from equipment like television sets, computers, fluorescent lights, light-dimmers etc. If the interfering equipment is inside your own house, you could easily install some mains-filters or capacitors (0.1 μ F 1000 volts MKT) in parallel with the dimmer or light. More often the interference is caused by equipment used by neighbours. If you are great friends with all of them you could consider taking the necessary steps inside their houses.

Since this is usually not the case or at least not very convenient we have some other suggestions. In case of using a longwire, a proper earth system is very important, which is not just a connection to the water-pipes that are often made of plastics, but rather copper-plated steel pipes driven into the ground on several places. Remember that the distance between the pipes should be at least some 5 metres and the pipes should be long enough to reach groundwater level. The wire from each pipe should be brought separately to the ground-connection of your receiver.

A very useful part in order to decrease interference is a magnetic balun that enables you to use coaxial cable to connect to your receiver. Better than a longwire is an inverted-V which seems to plck up less static since both ends of this aerial are symmetric.

The best results (i.e. better signal/noise ratio) is given by a loop. A proper loop for shortwave 41 m up to 76 m is basically a oneturn coil made of aluminium or copper with a diameter of about 1 metre. At both ends of this coil you connect a variable air-type capacitor of 0-500 pF. The signal could best be fed into a "modern" tube like an EF80 or E83F since they have a very high impedance. A diagram on how to make this is shown below.

Remember that this loop should be mounted as high as possible, which leads us to the next problem, how to adjust the variable capacitor when the loop is on top of the roof. We leave that to your own imagination.

Comments are more than welcome to our address, which you will find above.

CRAZY THOUGHTS

Chris ise
Box 220342
42373 WUPPERTAL
GERMANY
CWr@srs.joy.se

Hi this time maybe no crazy thoughts, but a comment.

As you may have already read, from the 25th to 27th May 1996 the German DX-Camp by the "Kurzwellenfreunde Achternberg" took place in Gelsenkirchen. This time it should be the third camp organised by the "KWFA" and of course better organised than the last ones, it was not planned from my side to go there but some guys involved persuade Jens Martin of Radio Benelux and me to go there by the promise that all things will be well organised. So on Saturday we went there finding the same chaos as always. Because of the bad weather, it was not possible to build up a tent and nothing was arranged by the KWFA. Some Free Radio listeners and enthusiasts stood in the rain there without any idea of accommodation. The best thing was the closing of the beer car

at exactly 10 p.m. by the owner of the pub like in the years before. Jens Martin and me saw no other chance than driving home, so a lot of money was gone for really nothing. Camps like this should not be supported in the future, it was really one of the worst Free Radio experiencies Jens and me have had so far. It is also not easy to explain something to Free Radio listeners (mainly to the younger ones who have to spend a lot of their pocket money!!), because if we (BNL & CWR) go there we are also indirectly supporting such a "camp". The only thing to say is that it is not worth to go to this camp, a more than disappointing meeting. I am really looking forward to the Merchweiler DX Camp in August that is really the best organised camp concerning Free Radio and shortwave radio at all, this time for the 24th time!

So ali you enthusiasts, hope to see ya there!!!

SWLCS DX CAMP 1996

In August 1996 the famous DX Camp of the Shortwave Listeners Club Saar (SWLCS) is taking place for the 24th time. The camp will also have the "Free Radio Tent" with a lot of information concerning Free Radio.

Come down to Merchweiler/Saar in the south-west of Germany and meet the Level 48 stations, e.g. Weekend Music Radio, Süd West Radio, Radio Benelux, PFBS, CWR, Radio Fusion International and many more... Bring your tent and join us. There is plenty of space at the camp!

The camp is a well-organised event by the SWLCS. You can obtain information from them by writing to:
SWLCS, P.O. BOX 1230, D-66585 MERCHWEILER/SAAR, GERMANY

Also listen out for further information coming to you soon over broadcasts by Radio Benelux and Crazy Wave Radio!

STARRY THOUGHTS

Kim Hawk

dearl I have pains in the stomach since I read PC131 Someone, let us call him Jolly Fake, wrote something about a poor mel I have never laughed so much in my entire life! There is a huge difference between 200 Watts and 100 Watts in power, but my 100 gives a readable signall And I'm heard! Come back again when you have reached that level! Never mind, I don't have the time waiting for that.

I also noted that Chris wrote something in that Issue, that OP's not interested in the SINPO. Well, I've always been considered as odd, singing along with records, been talking over subjects normal OP's wouldn't do. But as a matter of fact, I am very interested In getting technical feedback, then I know that with one kind of conditions, I will reach so far and with that quality of the audlo. I have a few regular listeners that use to write a lot of comments on the subjects I have brought up - and yes, I do like to receive some respond on what I'm saving. But a report with just comments and no good technical description of the signal and audio - nope, that ain't my style. I doubt that there are so many OP's out there that spend more time signing QSL-cards then producing shows. The DX-ers out there doesn't want to write long stories, most of them use some kind of template, and thanks to the word-processors, a reporttemplate can look quite personal, but my hawk-eyes always read between the lines. There are also those that excuse them self for using fill-in reports because they don't have the time writing a personal letter. Don't have the time! And Chris tells us that we OP's spends more time signing then producing, doesn't this sound interesting to you? The listeners are too busy, and the OP's have no

time.....strange world we are living in, eh?

No, I shouldn't spend so much time with this problem, as most of the listeners out there are QSL-hunters, we have to serve them as well. Perhaps with new fresh photo-QSL's. I don't care....... like the 76mb, and I intend to stay there as well. There are not so many listeners, only those that likes interesting talk and good music in the late evening. Perhaps you noticed that I did a test on 48mb in April, I have received a lot of mail from that broadcast, and I take the opportunity to thank everyone here, as it will take some time before I do another show on that band. Every station switch on at the same time and are gone at the same time. Back in the good old days, upon 76mb, there was perhaps Piraña and LWR running one week, next week Starshine and LWR, next week some other stations. Easy to listen and easy to choose between the music that you wanted. Lot of space in other words and always nice QSO's around 1 o'clock in the morning. Spending more time signing and verifying then producinal I know one station that spends too much time consuming beer then verifying! But that's another story, perhaps! tell you that one next time I'm here, consuming Stefan's pages in this excellent mag. Can't understand how he let me run here with all my destructive thoughts, a psychoanalyst would be happy to handle my case! I'm not crazy, just an OP that likes to sing along with the records.....trallahlah.....

See va, Kim

PS. By the way, if you bump into that Jolly Jumper Jake, tell him to go to sleep! It's past beattime for him!

In the next editon of Pirate Connection:

- Martin's complete Free Radio address list
- Report from the Merchweiler FR meeting
- And much more...
